

### III. COMMUNITY WATER SYSTEM INVENTORY INFORMATION

# COMMUNITY WATER SYSTEM INVENTORY INFORMATION

## INTRODUCTION

### KEY TO CODES AND ABBREVIATIONS

The Community Water System Inventory Information section contains data on community public water systems regulated by the Missouri Department of Natural Resources' Public Drinking Water Branch. A community public water system serves at least 15 service connections and is operated on a year-round basis or regularly serves at least 25 residents on a year-round basis (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). These systems include but are not limited to cities, water districts, subdivisions, mobile home parks, and institutions.

Community Water System Inventory Information provides basic information such as the required water system operator level and the required distribution system operator level, the year the system began providing water, the ownership type, the number of people served and the number of service connections. These systems are divided by type of community into three alphabetical lists. The first list contains city systems, the second list contains water district systems, and the third list contains subdivision, mobile home park, institution and miscellaneous systems. This section also provides a list of systems that sell water and whom they sell to and a list of systems that buy water and whom they buy from.

AVG = Average

MGD = Million Gallons per Day

WATER SYSTEM OPERATOR LEVEL (Listed 1<sup>st</sup>, if available, under Operator Level, example: "A1", or "A"):

- |   |   |
|---|---|
| A – Requires a minimum of 5 ½ years of plant operator experience. | B – Requires a minimum of 3 ½ years of plant operator experience. |
| C – Requires a minimum of 1 ½ years of plant operator experience. | D – Requires a minimum of ½ year of plant operator experience.    |

DISTRIBUTION SYSTEM OPERATOR LEVEL (Listed 2<sup>nd</sup>, if available under Operator Level, Example: "A1" or "1"):

- |  |   |
|--|---|
| 1 – Requires a minimum of ½ year of distribution operations experience.  | 2 – Requires a minimum of 1 year of distribution operations experience. |
| 3 – Requires a minimum of 3 years of distribution operations experience. |   |

Both the Water System Operator Level and the Distribution Systems Operator Level for community public water systems are classified according to system capacity, source of water, character of water, character of water being produced, complexity of treatment and other physical conditions that may affect a system. The department uses this classification system to determine the certification level necessary for the chief operator to supervise the operation of a facility (Missouri Safe Drinking Water Regulations 10 CSR 60-14.010).

OWNER TYPE:	F – Federal Government	P – Private
	S – State Government	L – Local Government

SOURCE WATER PERCENTAGES:	PCT GRD	= Percent of Source that is Ground Water
	PCT PUR GRD	= Percent of Source that is Purchased Ground Water
	PCT PUR SUR	= Percent of Source that is Purchased Surface Water
	PCT SUR	= Percent of Source that is Surface Water
