SECTION A: GENERAL NOTIFICATION INFORMATION

Section A-1: General Installation Information

| | | | | | |
|--|--|----------------------------|--|---------------------------------------|-----------------------------------|
| 1. INSTALLATION NAME | | 2. COUNTY NAME | | 3. PLANT ID | |
| 4. INSTALLATION TELEPHONE NUMBER WITH AREA CODE | | 5. INSTALLATION FAX NUMBER | | DATE STAMP (OFFICE USE ONLY) | |
| 6. INSTALLATION MAILING ADDRESS | | | | | |
| 7. CITY | | STATE MO | 8. ZIP CODE | | |
| 9. INSTALLATION STREET ADDRESS | | | | | |
| 10. CITY | | STATE MO | | 11. ZIP CODE | 12. MO SENATORIAL DISTRICT NUMBER |
| 13. INSTALLATION CONTACT PERSON | | | | 14. MO REPRESENTATIVE DISTRICT NUMBER | |
| 15. INSTALLATION CONTACT TELEPHONE NUMBER WITH AREA CODE | | | 16. INSTALLATION CONTACT E-MAIL ADDRESS | | |
| 17. PARENT COMPANY NAME | | | 18. PARENT COMPANY MAILING ADDRESS | | |
| 19. CITY | | 20. STATE | | 21. ZIP CODE | |
| 22. PARENT COMPANY CONTACT PERSON | | | 23. PARENT COMPANY CONTACT TELEPHONE NUMBER WITH AREA CODE | | |
| 24. PARENT COMPANY CONTACT E-MAIL ADDRESS | | | | | |

Section A-2: Type of Basic Operating Permit Notification

25. Initial Renewal Modification Administrative Amendment

Section A-3: Installation Description

26.

27. Has your installation submitted an Emissions Inventory Questionnaire in the last 3 years (including all Form 2.0's)?
 Yes No If answer is "No", submit a full EIQ packet.

Section A-4: Compliance Status

28. Will your installation be in compliance with all applicable requirements at the time of notification submittal and continue to comply with these requirements for the duration of the notification?
 Yes No If no, submit a compliance plan for items not in compliance.

29. Will your installation be in compliance with all applicable requirements promulgated prior to this notification that contain a compliance deadline within the term of this notification?
 Yes No If no, submit a compliance plan for those items not meeting compliance deadline.

Section A-5: Compliance Plan

If the applicant answers "No" to items 28 or 29, use *Section C: Comment Form* to provide which applicable regulations the installation will not be in compliance with, including how the installation shall meet compliance and the enforceable measures leading to compliance. The applicant shall include dates for the measure completions and final compliance.

Section A-6: Certification of Compliance

I hereby certify that, based on information and belief formed after reasonable inquiry, the air contaminant source identified in this application is in compliance with all applicable requirements, except as noted in compliance plan (item 34 above), if applicable. I certify, based on information formed after reasonable inquiry, the statements and information in this document are true, accurate and complete.

| | | | |
|---|--|-----------------------------------|--|
| 30. SIGNATURE OF RESPONSIBLE OFFICIAL OF INSTALLATION | | 31. DATE | |
| 32. TYPE OR PRINT NAME OF RESPONSIBLE OFFICIAL | | 33. TITLE OF RESPONSIBLE OFFICIAL | |

BASIC OPERATING PERMIT NOTIFICATION (CONTINUED)

SECTION B: APPLICABLE REQUIREMENTS

The installation shall comply with each of the following emission limitations. Consult the appropriate sections in the Code of Federal Regulations, or CFR, and Code of State Regulations, or CSR, for the full text of the applicable requirements. Refer to the instructions to understand fully what your obligations are under this section. Instructions for this form are available on the department's Web site at www.dnr.mo.gov/forms/index.html.

| Regulation or Construction Permit Reference | Emission Unit as labeled in the EIQ | Applicable Emission Limitation or Standard | Method of Compliance Determination |
|--|-------------------------------------|--|--|
| 10 CSR 10-6.045 Open Burning Requirements | | The open burning of tires, petroleum-based products, asbestos containing materials, and trade waste is prohibited. Refer to the regulation for a complete list of allowances. Nothing in this rule may be construed as to allow open burning which causes or constitutes a public health hazard, nuisance, a hazard to vehicular or air traffic, nor which violates any other rule or statute. | The installation may be issued an annually renewable open burning permit for open burning provided that an air curtain destructor or incinerator is utilized and only tree trunks, tree limbs, vegetation or untreated wood waste are burned. Open burning shall occur at least 200 yards from the nearest occupied structure unless the owner or operator of the occupied structure provides a written waiver of this requirement. Any waiver shall accompany the open burning permit application. The permit may be revoked if the installation fails to comply with the provisions or any condition of the open burning permit. In a nonattainment area, as defined in 10 CSR 10-6.020, paragraph (2)(N)5., the director shall not issue a permit under this section unless the owner or operator can demonstrate to the satisfaction of the director that the emissions from the open burning of the specified material would be less than the emissions from any other waste management or disposal method. |
| 10 CSR 2.070, 10-3.090, 4.070 or 5.160, Restriction of Emission of Odors | | No person may cause, permit or allow the emission of odorous matter in concentrations and frequencies or for durations that odor can be perceived when the air is diluted to 1:7 volumes of odorous to odor-free air for two separate trails not less than 15 minutes apart within 1 hour. (You must check the specific regulation.) | No odor violations noted, if and when scentometer readings are taken. |
| 10 CSR 10-6.050, Start-up, Shutdown and Malfunction Conditions | | Submit a report to the director within two days with the information specified in 10 CSR 10-6.050(3)(A)1-10. The permittee shall submit the information specified in 10 CSR 10-6.050(3)(A)1.-10 to the director at least 10 days prior to any maintenance, start-up or shutdown, which is expected to cause an excessive release of emissions that exceeds 1 hour. | In the event of a malfunction, which results in excess emissions that exceed 1 hour, the permittee shall implement corrective action and submit reports. |
| 10 CSR 10-6.060, Construction Permits Required | | Shall not commence construction or modification of any installation subject to this rule; begin operation after construction or modification; or begin operation of any installation which has been shut down longer than 5 years without first obtaining a permit. | The permittee shall apply for and obtain a construction permit as required by 10 CSR 10-6.060. The permittee shall maintain copies of all issued construction permits on-site. |
| 10 CSR 10-6.065, Operating Permits | | The permittee shall comply with all applicable requirements identified in the operating permit, or OP; file for renewal of this OP at least 6 months prior to the expiration date of this OP; and retain a copy of the OP on-site and make available to any department personnel upon request. | The permittee shall maintain a current equipment list on-site with the date of installation of the equipment. |
| 10 CSR 10-6.080, Emission Standards for HAPs, 40 CFR Part 61, Subpart M, National Emission Standard for Asbestos | | Shall follow the procedures and conduct monitoring according to the requirements of 40 CFR Part 61, Subpart M for any affected activities. | As stated in the procedures and monitoring according to the requirements of 40 CFR Part 61, Subpart M. |
| 10 CSR 10-6.100, Alternate Emission Limits | | Alternate emission limits on a case-by-case basis. | Obtain an alternate emission limits permit in accordance with 10 CSR 10-6.100 prior to the limits becoming effective. |
| 10 CSR 10-6.110, Submission of Emission Data, Emission Fees and Process Information | | Submittal of Emissions Inventory Questionnaire by frequency noted in 10 CSR 10-6.110. | The permittee shall complete and submit an EIQ in accordance with 10 CSR 10-6.110. |

BASIC OPERATING PERMIT NOTIFICATION (CONTINUED)

| SECTION B: APPLICABLE REQUIREMENTS (CONTINUED) | | | |
|---|---|---|--|
| REGULATION OR CONSTRUCTION PERMIT REFERENCE | APPLICABLE EMISSION POINT (AS LISTED IN EIQ) | APPLICABLE EMISSION LIMIT OR STANDARD | METHOD OF COMPLIANCE |
| 10 CSR 10-6.130, Controlling Emissions During Episodes of High Air Pollution Potential | | This rule specifies the conditions that establish an air pollution alert or emergency and the associated procedures. | The permittee shall submit an appropriate emergency plan if required by the director. |
| 10 CSR 10-6.150, Circumvention | | No circumvention. | The permittee shall not conceal or dilute any emission that violates a rule of the Missouri Air Conservation Commission. |
| 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin <i>(Does not apply when there are fugitive emission points.)</i> | | 1) The permittee shall not cause or allow to occur any handling, transporting or storing of any material; construction, repair, cleaning or demolition of a building or its appurtenances; construction or use of a road, driveway or open area; or operation of a commercial or industrial installation without applying reasonable measures as may be required to prevent, or in a manner which allows or may allow, fugitive particulate matter emissions to go beyond the premises of origin in quantities that the particulate matter may be found on surfaces beyond the property line of origin. The nature or origin of the particulate matter shall be determined to a reasonable degree of certainty by a technique proven to be accurate and approved by the director. 2) The permittee shall not cause nor allow any fugitive particulate matter emissions to remain visible in the ambient air beyond the property line of origin. | The permittee shall conduct inspections of its facilities sufficient to determine compliance with this regulation. If the permittee discovers a violation, the permittee shall undertake corrective action to eliminate the violation. The permittee shall maintain the following monitoring schedule: 1) The permittee shall conduct weekly observations for a minimum of eight consecutive weeks after permit issuance. 2) Should no violation of this regulation be observed during this period then- A) The permittee may observe once every two weeks for a period of eight weeks. B) If a violation is noted, monitoring reverts to weekly. C) Should no violation of this regulation be observed during this period then- 1. The permittee may observe once per month. 2. If a violation is noted, monitoring reverts to weekly. If the permittee reverts to weekly monitoring at any time, monitoring frequency will progress in an identical manner to the initial monitoring frequency. |
| 10 CSR 10-6.180, Measurement of Emissions of Air Contaminants | | The director may conduct or require tests to determine the quantity and/or nature of emission of air contaminants from a source. | The installation shall conduct or allow tests to be conducted upon request of the director. |
| 10 CSR 10-6.220 Restriction of Emission of Visible Air Contaminants <i>(Does not apply when there are no visible emission points.)</i> | | No owner or other person shall cause or permit to be discharged into the atmosphere from any source any visible emissions in excess of the limits specified by this rule. This permit will contain the opacity limits identified (10, 20 or 40 percent) for the specific emission units. (you must check the specific regulation) | The permittee shall conduct opacity readings on each emission unit using the procedures contained in EPA Test Method 22. The permittee is only required to take readings when the emission unit is operating and when the weather conditions allow. If the permittee observes no visible or other significant emissions using these procedures, then no further observations are required. For emission units with visible emissions perceived or believed to exceed the applicable opacity standard, the source representative would then conduct a Method 9 observation. The permittee must maintain the following monitoring schedule: 1) The permittee shall conduct weekly observations for a minimum of eight consecutive weeks after permit issuance. 2) Should the permittee observe no violations of this regulation during this period then- A) The permittee may observe once every two weeks for a period of eight weeks. B) If a violation is noted, monitoring reverts to weekly. C) Should no violation of this regulation be observed during this period then- 1. The permittee may observe once per month. 2. If a violation is noted, monitoring reverts to weekly. If the source reverts to weekly monitoring at any time, monitoring frequency will progress in an identical manner from the initial monitoring frequency. |
